ACCOUNTANTS

Dear Client,

We are pleased to announce a new service that you may be interested in, we now have the ability to host your Quick books Mac or Windows datafiles on a safe and secure dedicated server through our information technology provider, Solution Builders. The advantages to this service include:

- The ability to connect to your Quick books file from more than one location. You could have access from multiple locations such as your desktop computer at work, a desktop computer from home and/or your laptop or tablet.
- Quick books data will be backed up on a daily basis and you will have anti-virus and firewall protection for additional security.
- Log in to the application would require 2 factor authentication, which would provide more security for your Quick books file.
- If you have multiple Quick books company files, these files can all be stored on this server at no additional cost.
- If desired, our accounting staff will have access to your Quick books file at any time to assist with any of your accounting needs such as assistance with bank reconciliations, general journal entries and other troubleshooting needs that may arise. This would also make it unnecessary to provide us with Quick books backup or accountant's copies.

This service would also come with some support service provided by Solution Builders including assistance in opening the Quick books application in the remote environment, Quick books application updates such as minor updates, initial printer configuration setup if issues arise and issues related to ID password reset or locked accounts. Examples of support services not included will be communicated to you upon request.

You must have a currently licensed Quick books 2018 or later product with a valid product key code and you may discontinue this service at any time. The cost for this service would be a one-time set up fee of \$120. After the initial setup cost, your monthly cost would be \$80 which would allow access to your file for one user at a time. If you wish to have multiple users with access to your file at the same time, the cost would be an additional \$60 per month per user.

If this service is of interest to your business or you have any additional questions regarding the above, please do not hesitate to contact Scott Gavin at our River Falls office at 715-425-7521 or Barb Waalen at our New Richmond office at 715-246-6976.

Sincerely,
